

My wife and I are Owner/Operators of an 18 wheeler, and as such travel approximately 18,000 miles each month. In order for us to minimize the risks of traveling all across the country, it is absolutely essential for us to be able to receive up-to-the-minute weather information. The only way we know to get this is via the XM satellite radio.

Thank you for your consideration.

Judy & Svend Demant.
